

Introduction to Node.js

Doug Toppin
dougtoppin@gmail.com
github.com/dougtoppin

Agenda

- What is Node.js?
- npm
- Why would I use it?
- Syntax
- Some examples
- Live demo

What is Node.js?

- From nodejs.org
- Node.js is a platform built on Chrome's JavaScript runtime for easily building fast, scalable network applications. Node.js uses an event-driven, non-blocking I/O model that makes it lightweight and efficient, perfect for data-intensive real-time applications that run across distributed devices.

npm

- Node Package Manager (NPM)

Why would I use it?

- Quick and easy script editing
- My experience has been that installation is much quicker/easier than Rails (and gem)

Syntax

Some examples

Live demo

- http server
- fixed protocol response
- directory list
-
